PROFESSIONAL PROFILE

Versatile Business and Data Analytics professional with a proven track record in delivering data-driven solutions across multiple industries and geographies. Business and data analytics professional with 6+ years of experience across management reporting, process improvement, financial and workforce analysis, supply chain, forecasting and systems delivery. Skilled at turning fragmented operational data and business questions into reliable KPIs, dashboards, forecasts and practical recommendations. Hands-on experience with Power BI, DAX, Power Query, SQL, Python, advanced Excel and enterprise systems including HORIZON, IFS ERP and SAP. Comfortable working between business, Finance, HR, IT, Sales and Operations teams in Baltic and international environments.

CORE EXPERTISE

- Data and BI analytics - data preparation, modelling, DAX measures, interactive Power BI dashboards, automated reporting, reconciliation and data-quality controls.
- Business and process analysis - requirements gathering, KPI definitions, as-is/to-be analysis, root-cause investigation, acceptance criteria, UAT, implementation follow-up and documentation.
- Performance and controlling - budget-versus-actual analysis, costs, workforce metrics, sales, demand, inventory, service levels, trends, deviations and forecasting.
- Systems and delivery - ERP/EDI migration and integration support, data mapping, master-data validation, transaction testing, issue resolution and stakeholder adoption.

PROFESSIONAL EXPERIENCE

Demand Planner and Operations Analyst

Jun 2020 - May 2022

SIA Himalaya Wellness Latvia

- Analysed demand forecasts, actual sales, inventory and product availability across European markets, identifying deviations, supply constraints and customer-service risks.
- Maintained and validated SAP customer and product master data and coordinated corrections with Sales, Operations, production teams in India and Dubai and external logistics partners.
- Supported S&OP, data migration and reporting improvements by consolidating information from multiple sources and translating results into practical planning actions.

Business Data Analyst | HR and Financial Reporting

Apr 2025 - Present

AS CleanR Grupa

- Developed Power BI dashboards and automated reports supporting workforce planning, personnel-cost monitoring, budget performance and management decision-making.
- Combined and validated data from HORIZON, MEMO, Excel and internal sources; reconciled periods, filters, totals and duplicates and investigated discrepancies with HR, Finance and IT.
- Created DAX measures, KPI calculations and structured data models for headcount, turnover, sick leave, salary ranges, personnel costs and operational trends.

Supply Chain Manager | Customer Service and Logistics Team Lead

May 2022 - Apr 2025

SIA Lofbergs Baltic

- Analysed sales, customer demand, inventory, product availability, delivery performance and logistics costs across Baltic markets, producing management reports and forecasts for approximately 100 SKUs.
- Coordinated supply and production requirements of around four tonnes per day, including 21 green-coffee components, while monitoring service, stock and operational risks.
- Contributed to IFS ERP, EDISOFT and TELEMA EDI improvements through requirements clarification, data mapping, master-data validation, transaction testing, issue investigation and user acceptance.

Independent Analytics Projects

2025 - Present

Freelance Power BI and Data Analyst

- Define business requirements, KPIs, data sources and calculation logic; build Power BI data models, DAX measures and decision-oriented dashboards and validate outputs against source data.
- Delivered salary-market analytics for SIA ERDA and finance, receivables, workforce-capacity and project-utilisation reporting for SIA Buvdizains, using Power BI and repeatable data-preparation workflows.

TECHNICAL SKILLS

BI AND DATA: Power BI, DAX, Power Query, SQL, PostgreSQL, Python, pandas, R, KNIME, advanced Excel, Power Pivot, PivotTables, XLOOKUP, INDEX/MATCH

METHODS: KPI design, data modelling, variance and trend analysis, forecasting, data reconciliation, anomaly investigation, root-cause analysis, UAT, process documentation

SYSTEMS: HORIZON, MEMO, IFS ERP, SAP, EDISOFT, TELEMA, Snowflake (familiar), ClickHouse (familiar)

CERTIFICATIONS: Certified Internal ISO Auditor

CURRENTLY LEARNING: Python (advanced), Full Automation, Vibe Coding, GitHub workflow, CI/CD pipelines

INTERNATIONAL & TECHNICAL: Experience working in Baltic and Nordic markets; developed Python-based automation pipelines, CI/CD workflows, and AI-assisted solutions for business intelligence and recruitment.

EDUCATION

- RISEBA University of Applied Sciences (Sep 2025 - Present) — Master's studies in Big Data Analytics. Top results: Power BI and Power Pivot, Business Requirements and Python ; Machine Learning with Python, SPSS, R and Multivariate Statistics . Additional studies include SQL, forecasting and Generative AI.
- RISEBA University of Applied Sciences (Sep 2020 - Jan 2025) — Bachelor's Degree in Business Management; E-Business Manager qualification
